Langenthal, 31.12.2022 – 1.1.2023

Silicon-Silvesterparty in Switzerland Langenthal

The story / Andreas Lützenberger (written first in american english language)

This last and first photo above is great. The kernels are convertible. 18 new products was just opened to Monday last week. Then I has market-Zipped them into 6 productarticles 046, 047, 048, 049, 050! All new 18 (US\$, €, CHF Tourisme EU California differences with cart-systems) can be delivered too in the whole world now.

16 to 10 is a design for business for quick money with Logo and with photos left and right on favorites destops or editorials. 3000 articles kernel is possible.

A4 is a simply scrolling version on favorites smartphones. But here are 6000 articles possible.

The changings from A to B or B to A (16 :10 [go to](#) | [or](#) | [go back](#) to a4) are possible for 500.-

Want you 6000 articles at least, it's better to begin with model a4, and later to compile to the 16to10-model with the 6000-articles-kernel.

A split occurs with every URL call: The machine scan PHP script implemented in the open script part and controlled by you will coordinate the corresponding URL of 16:10 or a4 with every hit.
